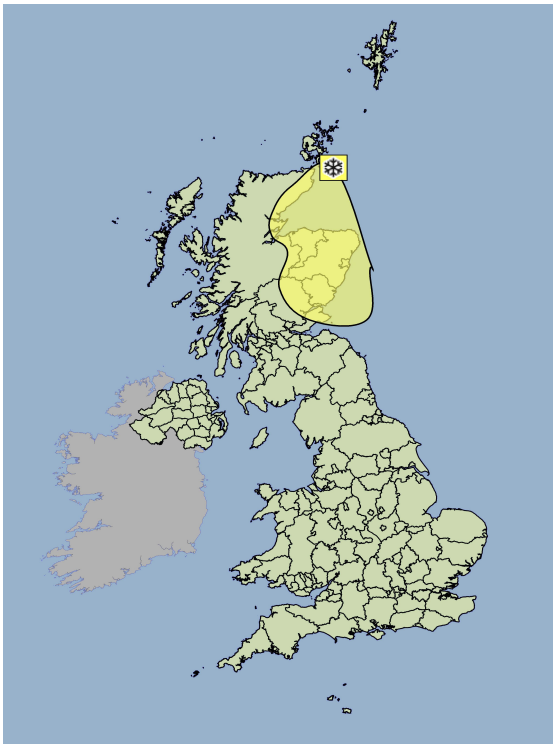
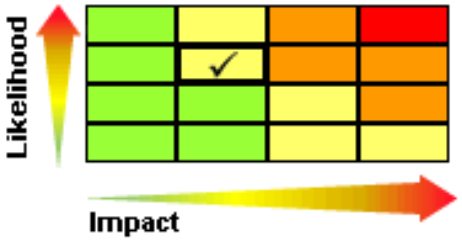
National Severe Weather Warning Service





Chief Forecasters Assessment
East or northeasterly winds will be bringing increasingly cold air into east and northeastern Scotland during Monday evening and into Tuesday morning. This will help to turn the rain or sleet increasingly to snow, so that accumulations of 2-5 cm could occur at low levels, with up to 10 cm on hills.

The Met Office have issued a **Yellow Alert** of **Snow**

Valid from **15:00 on Mon, 18th Mar 2013** until **23:55 on Tue, 19th Mar 2013**

Outbreaks of rain or sleet on Monday afternoon may well turn to snow on higher level roads above 300m in east and northeast Scotland. During Monday evening and into Tuesday morning this rain or sleet will turn to snow increasingly at lower levels. The public should be aware of the risk of disruption to transport through this period.
